

Information Bulletin No 7

April 2008

Dear Customer,

Dog Bolts.

Climatec are please to announce the introduction of a new type of Dog Bolt, full details of this are shown on the attached leaflet.

This new type Dog Bolt has several benefits over the current (old) type which has to be routed into the outer frame, one distinct advantage is that it can be adjusted on site, and can be retro fitted if required.

We intend to fit the new Dog Bolt on all jobs, where specified, from the beginning of next week, 28th April.

This new Dog Bolt will not be available on 70mm Bevelled "Classic" French Doors unless they are fitted with a passive lock - sometimes referred to as a working handle on the slave leaf, for an explanation on this point please call our Technical Dept.

Please contact us immediately if you have orders in our system where you have specified Dog Bolts and require the old type and we will honour these, thereafter they will cease to be available.

The cost of this Dog Bolt will be £ 8.00 per Sash, an increase of £ 2.00 on the cost of the existing Dog Bolt.

Announcing our New Adjustable Dog Bolt

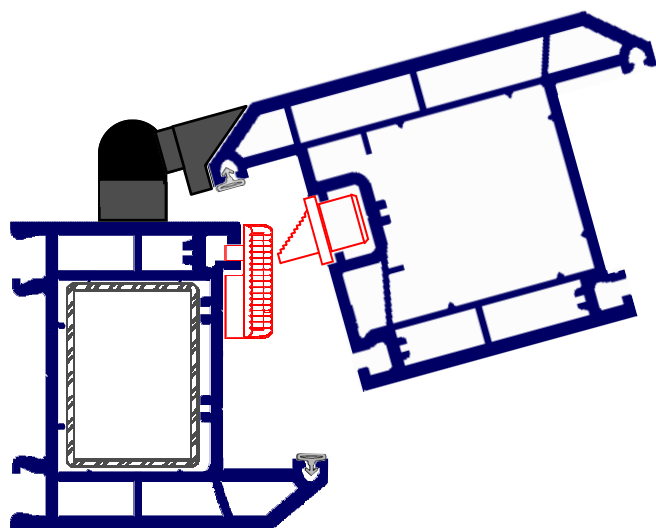

Sash Part

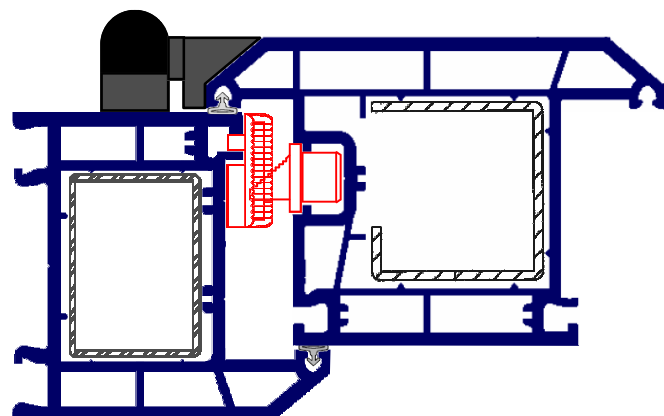

Frame Part
