

Dear

NEW from Climatec – Product Update & Information Sheets

We are pleased to introduce to you the first of many product news bulletins now being produced by Climatec Windows. Our aim is to inform you of all new additions and updates to our extensive range of PVCu windows, residential doors and conservatories, and to provide as much detail as possible to assist you when selling to your customers.

The enclosed product news bulletins detail information on the REHAU Heritage Vertical Sliders now being manufactured by Climatec and updates to our range of casement window handles and residential door flag hinges, which we will be phasing in over the coming weeks.

In addition to these bulletins, we will be producing more detailed brochures and newsletters, of which we hope will assist you with your marketing needs and satisfy both yours, and your customer's requirements.

Please do not hesitate to contact us if you have any further enquiries or would like to discuss any of this information further.

Kind regards,

Yours
