

4 March 2010

Dear

New Product Announcement

New Flag Hinge

We are pleased to announce that we will be introducing a new Flag Hinge for Residential Doors when stocks of our existing hinge are exhausted...this new hinge is branded as the "Sigma Hinge".

We have decided on this change as the new hinge is available in a wider range of finishes than the present hinge and in this respect we have been using it in recent months, eg on doors requiring black hinges. The new hinge is available in White, Brown, Acorn, Black, Gold and Chrome finishes.

The new hinge has the same range of adjustment and works in the same way as the present hinge therefore we do not anticipate any complications for installers already familiar with our current hinges.

A product launch flier is enclosed for your information, however should you have any further queries please do not hesitate to contact us.

Vertical Sliders in White Woodgrain Finish

We are also delighted to announce that we will shortly be able to offer the Rehau Heritage Vertical Slider in **White Woodgrain** finish. We are currently the only Rehau fabricator able to offer this product which will be an exciting new addition to our already comprehensive range of products.

As with all Woodgrain products this new finish will carry a premium price but due to it's exclusivity we believe it will prove popular with discerning customers – final prices to be announced.

Product availability is anticipated for end March/early April.

Please contact the sales office for further details.

Yours
