

### Glazing Beads

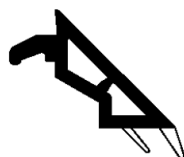

We were recently informed by REHAU that the Extrusion Die used to produce the Ovolo Glazing Bead is wearing out, and is not being replaced, this means that we cannot guarantee future availability of this item.

At present we do not have a problem with stocks of Ovolo bead but, as an alternative, we will shortly be able to offer an alternative "Ogee" shaped Bead, this will be available from the middle of August.

You may continue to specify Ovolo Bead but we would suggest that you now prepare for its withdrawal by moving over to the Ogee Bead where possible.

We will of course keep you informed of the stock situation.

Examples of our current Glazing Bead range are shown below.

**Bevel Bead**  
for 28mm Units

**Ogee Bead**  
for 28mm Units

**Scotia Bead**  
for 24mm Units

**Ovolo Bead**  
for 28mm Units

This bead is likely to be withdrawn soon.

### New Bay Window Order Forms

To simplify the process of ordering Bay Windows, both for our Customers and our office staff, we have prepared a set of order forms which cover the most common types of Bay Windows.

We are providing all customers with two master sets of these forms, please photo copy them as required for future use.

Always use these forms when ordering common Bay Windows, doing so will enable us to process your orders promptly and efficiently, should you fail to provide all necessary Information we regret that production of your order may be delayed.

Thank you for your co-operation.
