

Quality windows, doors and conservatories

...OF DISTINCTION

Suppliers
of PVCu
windows,
doors and
conservatories

Your home is the biggest single investment you will ever make and choosing new replacement windows and doors, or adding a conservatory, is a big step. After all, you will expect your new investment to make your home more attractive and comfortable, and to also add to its value.

There are many companies to choose from and they will all claim to supply the best products, so you need to choose carefully. However, by choosing us, you can rest assured that we will supply and install fully accredited products of the highest quality that will last a lifetime.

“Windows and doors define the character of a home”

Few other home improvements will have a greater overall effect on the appearance and desirability of your home

Today's house building reflects both traditional, and more recently, modern designs. To complement this, our windows and doors can be made to replicate traditional joinery features with fully sculptured 'contour' edge details to give an authentic period look. However if a clean modern appearance suits your property then our 'classic' chamfered frames are the perfect choice.

Our variety of window frame styles, colours and glazing will ensure the product you choose will complement your home perfectly

Classic chamfered frame in Anthracite Grey smooth finish

Sculptured edge frame in white

Black woodgrain, chamfered frame with encapsulated glass design

Our windows and doors are manufactured from the highest grade PVCu profiles designed and developed by REHAU, the leading European manufacturer in thermoplastic extrusions. REHAU are also the UK market leader in PVCu window and door systems producing up to 44,000,000 metres of extruded profile per year at their factory in Blaenau, North Wales.

With REHAU products you not only get a proven, stylish and attractive window and door system, but also one that includes all the benefits of modern PVCu. Benefits that include low maintenance and greater security, everything to give you complete peace of mind. No wonder it's the preferred choice of so many people, including architects, when specifying windows and doors.

“First Impressions Count”

The variety of designs available in our portfolio are equally suited for the refurbishment of traditional or modern properties. Whatever the style of your home, we will ensure that the window designs blend in beautifully. Select from casement windows, bay and bow casements or french casements, vertical sliding sash or tilt and turn 'continental style' windows for easy cleaning from the inside.

You can be confident that you are choosing the very best range of products for quality, style, security, reliability and energy efficiency

Secured by Design

Official Police Security Initiative

Your family home is your protection from the outside world, and being secure and safe is paramount.

For that extra peace of mind our enhanced security windows and doors can be specified to Secured By Design standards. Only products tested and certified by this scheme can be assured of extra security performance and become a 'Police Preferred' product.

**“Dare to dream?
A conservatory
adds a new
dimension to
your home.. and
your lifestyle”**

The design of our multi-chambered profiles means that, not only does it have excellent insulation properties, but also it enables us to insert larger steel reinforcement sections to give your windows and doors more rigidity and strength.

The unique, high quality compound used to create the renowned REHAU smooth white gloss finish means that your windows and doors keep their pristine appearance and they don't warp, rot or need painting, unlike their timber counterparts.

To further enhance our products REHAU have developed a range of finishes. All windows and doors are available in a choice of foiled or painted finishes as well as the popular pristine, bright white.

With 25 different coloured foils and a wide variety of RAL paint colours, you can order your windows and doors to complement your interior and exterior decor - for example, a clean white finish on the inside and either a woodgrain or colour finish on the outside.

The list of glazing options is just as impressive, combined with our latest sealed unit technology you can really reflect your individual style and personality. In addition to clear and patterned glass we offer an extensive array of lead light, stained and georgian styles for true aesthetic appeal.

**Sometimes
all you
need is a
little splash
of colour**

Lockable handles, shootbolts, anti-lift hook locks and hinge locking devices provide the ultimate security of window and door fastening

Metal shoot bolts and mushroom striker plate combination gives optimum security to vulnerable corners

Elegance, innovative design and security are built into our systems at every stage

The smaller detail makes all the difference. Our accessories are carefully chosen to match the quality of our windows, doors & conservatories

**“Energy
efficient and
environmentally
friendly”**

Due to excellent thermal efficiency of our frames, drafts and cold spots are eliminated to the extent that your home is warmer. Furthermore our products have been fully certified by the British Fenestration Rating Council (BFRC) to receive energy ratings of A, B and C, enabling you to have thermally efficient windows that create a positive home environment inside, whilst significantly reducing carbon emissions into the atmosphere outside.

**“Replacing your windows with
energy efficient frames and
glazing can save you money
by reducing your heating bills”**

Quality is top priority when producing your windows, doors and conservatories, with the highest standards set from beginning of fabrication to installation in your home
