FUHR 2 HOOKS, 2 CAMS INTERNAL RESTRICTOR

- Added security for front doors.
- Integral restrictor enables partial opening without compromising security
- Lever operated and split spindle locks can be offered with a built in opening restrictor
- The restrictor engages simply with a turn of the knob, allowing the door to be partially opened
- The door has to be closed and the restrictor disengaged and re-opened before a visitor can gain access
- Thumb turn handles available in white, chrome or gold

MACO - A-TS SELF-LOCKING DOOR LOCK (STANDARD HEIGHT)

When the door closes the A-TS multi-point locking system automatically engages into the frame maximising the weather performance, sound and thermal insulation and offering excellent security.

- Can also be used with the MACO openDoor and commercially available access control systems
- MACO silent latch function ensures easy closing of the door leaf
- Non handed door lock can be used on both left or right handed doors
- Can be used as a Lever/Lever or Escutcheon
- Even gasket compression over the entire door height
- Sound and thermal protection due to the automatic function
- Durable due to permanent gasket compression over the entire door leaf (3 latches counteract any distortion of the door leaf)
- Successfully tested to PAS24

For further assistance, call 01702 613733

MACO - A-TS VARIA SELF-LOCKING DOOR LOCK (HERITAGE HEIGHT)

When the door closes the A-TS multi-point locking system automatically engages into the frame maximising the weather performance, sound and thermal insulation and offering excellent security.

- Can also be used with the MACO openDoor and commercially available access control systems
- MACO silent latch function ensures easy closing of the door leaf.
- Non handed door lock can be used on both left or right handed doors
- Convenient height key cylinder for a Heritage door style look
- Even gasket compression over the entire door height
- Sound and thermal protection due to the automatic function
- Durable due to permanent gasket compression over the entire door leaf (3 latches counteract any distortion of the door leaf)
- Successfully tested to PAS24

WINKHAUS AUTOLOCK AV2 (STANDARD HEIGHT)

As soon as the door is closed, automatic locking takes place with 2 high tensile steel hooks engaging without the need to lift a handle. The locked door can then be opened by operating a thumbturn cylinder. Entrance is gained by use of a key.

- Automatically locks - No need to lift the handle to engage.
- When closed, two solid anti-pushback hooks automatically operate to achieve instant security. A final turn of the cylinder engages an extra deadbolt.
- Successfully tested to PAS24 and weather performance.
- High security nickel plated steel hooks fully penetrate the heavy duty steel keeps to help prevent forcing apart of the door and frame.

11-14 Fletchers Square, Temple Farm Industrial Estate, Southend-on-Sea, Essex SS2 5RN

WINKHAUS AUTOLOCK AV2 HERITAGE (HERITAGE HEIGHT)

The Winkhaus AV2 Heritage is a modern door locking system created to compliment replacement period doors and also prestige modern styles. The euro profile locking cylinder is located at a similar height to a traditional round cylinder pull but provides instant higher security as the lock is operated automatically as soon as the door is closed.

- No lever handle required to operate the locking points.
- Lock can be deadlocked or opened externally by key.
- The door can be opened internally by a thumbturn.
- When closed the door is automatically locked and the key is required to gain entry from the outside. A final turn of the cylinder engages an extra deadbolt.
- Automatic locking on closing the door with 2 solid anti pushback hooks which fully penetrate the steel keeps helping to prevent forcing apart of the door and frame.
- Compliments both traditional period and contemporary doors.
