GREENTEQ GAMMA Q-STAR SECURITY CYLINDER

The greenteQ Gamma Q-Star Profile Cylinder is TS007:2014 approved and has achieved 1 Star rating.

A premium quality product that features protection against bumping, picking and drilling. Both sides also have a sacrificial break point to hamper attempts to gain entry by snapping the cylinder.

- 40/40 for the greenteQ Alpha and the Sweet Handles

- 35/35 for the Coastal Blu™ handles

ULTION 3* SECURITY CYLINDER

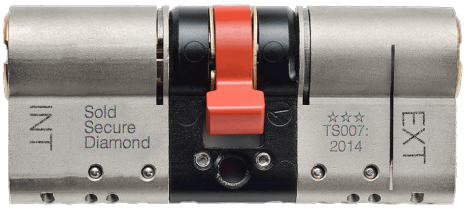

The Ultion lock has been tested to the needs of the British Standard TS007 3 star, without having to be bolstered with an expensive high security handle or guard.

When Ultion is locked it is the actual centre cam that gets independently secured, not secured to the internal plug – this means that even when the key is left on the inside of the lock, Ultion is still secure.

- 40/40 for the greenteQ Alpha and the Sweet Handles

- 35/35 for the Coastal Blu™ handles

INVINCIBLE CYLINDER - DECEUNINCK UPGRADE

The Deceuninck Slider24+ Document Q compliant sliding door comes with the Invincible Cylinder. Reinforced with 5 times more metal than a standard cylinder, the 6 hardened high security pins for the ultimate anti-pick, drill and bump resistance.

It's robust shape is a strong visual deterrent and it has been independently tested to British Standard Kitemark TS007 and Secured by Design accredited.

- 40/40 for the Pembroke Invincible handle
